CEMCOLORI

Waterproof concrete stucco for floor and wall

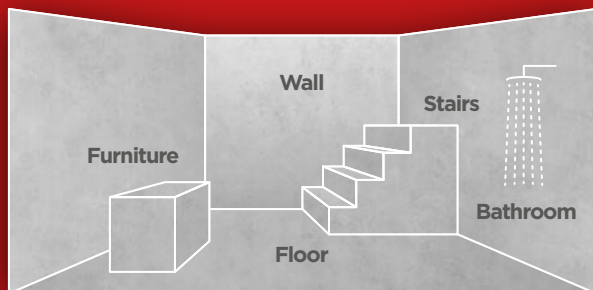

Seamless design for every taste

Cemcolori is a high-quality, seamless, and waterproof concrete-look finish for walls, floors, and furniture. Made from cement combined with a specially developed resin, Cemcolori is strong, flexible, and highly low-maintenance.

Cemcolori is waterproof

Cemcolori products are 100% waterproof (Kiwa DIN EN 1062-3), making them perfectly suited for use in bathrooms and showers. Thanks to their waterproof properties, there are no issues with mould. To protect against dirt build-up, Cemcolori is finished with a specially developed coating. This makes it exceptionally easy to clean.

Where can Cemcolori be used?

Thanks to its unique composition, Cemcolori is an ideal solution for any room in your home and can be applied to almost any stable surface.

It's not only suitable for walls and floors, but also for furniture, stairs, and kitchen countertops.

100% natural materials

Cemcolori is eco-friendly, sustainable, and made from 100% natural materials. With extremely low emissions, it's a healthy choice for your home. Cemcolori also meets today's standards for safety and comfort—something we're proud of!

Easy to maintain

Thanks to its specially developed protective coating, Cemcolori is highly low-maintenance. The maintenance instructions ensure it stays that way over time. A dedicated Cemcolori Cleaner is available for everyday cleaning, and for tougher stains, there's a degreaser for deep cleaning.

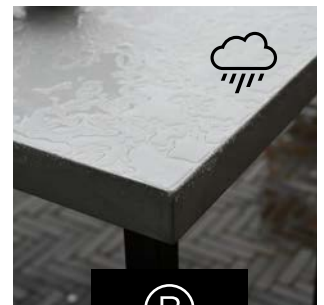

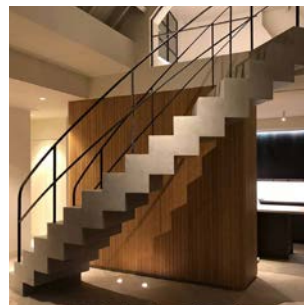

Wide range of colours

Cemcolori's concrete look is available in 36 modern, carefully selected standard colours.

On request, we can also produce it in any RAL or NCS colour. Just get in touch with us!

Cemcolori Basis Deco

CEMCOLORI

Waterproof concrete stucco for floor and wall

The colours shown may differ from the actual colours. In practice, the colour of Cemcolori LavaPox may also vary due to lighting and the underlying surface.

Cemcolori LavaPox and LavaPox25: Exclusive floors with fine lava stone particles

LavaPox and LavaPox25 are fine lava stone products bound with an epoxy resin. The difference between LavaPox and LavaPox25 lies in the colour of the lava stones: LavaPox25 contains lighter-coloured stones. As a result, a LavaPox floor shows more texture, while a LavaPox25 floor has a more even colour. LavaPox gets its colour from the addition of LavaPox pigment.

For wet and dry areas

Thanks to their excellent adhesion and slight flexibility, LavaPox and LavaPox25 can be applied to many surfaces. With proper preparation and application, they are suitable for floors in offices, showrooms, bathrooms, kitchens, living rooms, and more.

Available in 45 modern standard colours

In addition to the 36 standard Cemcolori colours, LavaPox comes in 9 extra shades. There's a suitable colour for every interior.

On request, Cemcolori LavaPox and LavaPox25 can also be produced in any RAL or NCS colour.

PRONTO

PRONTO 2

Available in
36 standard colours

Cemcolori Pronto and Pronto2: Ready-to-use and fast

Cemcolori Pronto is a single-layer concrete stucco that's ready to use straight from the bucket—for floors, walls, and furniture. Compared to the standard Cemcolori concrete stucco, Pronto dries one day faster and has a slightly rougher, more dynamic texture. The colour result is more even.

Cemcolori Pronto2 is applied in two layers. The first is called Media, and the second Fino. This results in a slightly finer surface texture. Pronto2 allows for more detailed finishes, fully tailored to the client's wishes.

Cemcolori Pronto and Pronto2 are available in 36 standard colours. There's a perfect match for every interior. On request, Pronto and Pronto2 can also be tinted in any RAL or NCS colour—just get in touch with us.

We're happy to connect you with a certified Cemcolori applicator. They have the experience and expertise to bring your vision to life.

ART

COLLECTION

Cemcolori Art Collection is both decorative and functional

Cemcolori concrete stucco is naturally waterproof, making it unique in the market. The Cemcolori Art Collection offers the same benefits as standard Cemcolori concrete stucco and is applied in multiple layers. This creates a decorative relief with artistic textures that resemble leather, wood, rock, fossils, or natural stone—making each wall truly one of a kind.

You can also customise the colour entirely to your liking—think rust, gold, or copper tones. Let your imagination run free. Thanks to this versatility, the Cemcolori Art Collection fits into any interior, in any space.

We're happy to connect you with specialised Cemcolori Art applicators. They're ready to take on the challenge and have the experience and expertise to bring your ideas to life.

STUCCO
RESPIRA

BREATHABLE WALL FINISH WITH GLITTER

EASILY CREATE A PLEASANT AND ATMOSPHERIC LIVING ENVIRONMENT

THE BENEFITS OF STUCCO RESPIRA:

- It enhances a comfortable indoor climate by absorbing moisture and releasing it when the air is dry.
- It contains decorative glitter that becomes more or less visible depending on the application technique.
- It is easy to apply for both professionals and DIYers.
- Cemcolori offers 9 trendy standard colours.
- Stucco Respira can be tinted with standard or custom pigments/latex paint.
- Stucco Respira can be finished with a protective wax layer for areas with intensive use.

STUCCO
RESPIRA

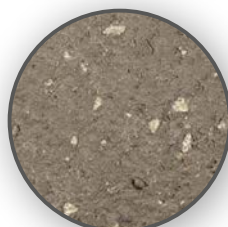

IN 9 TRENDY STANDARD COLOURS

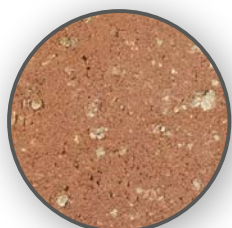

NCS S 2002-R50B

NCS S 3500-N

NCS S 8000-N

NCS S 6030-Y60R

NCS S 4020-Y30R

NCS S 5005-Y20R

NCS S 5502-Y

NCS S 6005-G50Y

NCS S 7010-B10G

We recommend priming the wall with Stucco Respira acrylic primer beforehand. It is available in a 1 kg bottle, suitable for approximately 10 m².

Stucco Respira comes in a 12 kg bucket, which covers 8 to 10 m² of wall surface. Add water and your chosen pigment or latex, then mix thoroughly with a mixer until you achieve a smooth, even consistency.

Stucco Respira is then ready to be applied to the wall using a trowel.

For more texture in the finish and to make the glitter stand out more, Stucco Respira can be sanded after application.

The colours shown may differ from the actual colours. In practice, colour appearance may vary due to lighting and the underlying surface.

PERLAMURO

CONCRETE LOOK WITH PEARLESCENT EFFECT

PerlaMuro is a modern concrete-look wall finish with a pearlescent effect. It adds a luxurious and contemporary touch to your interior. PerlaMuro is easy to apply using a trowel or block brush. If you use a trowel, you'll achieve a smooth, even finish. If you use a block brush, you'll create a more textured wall with depth and relief.

PERLAMURO

CONCRETE LOOK WITH PEARLESCENT EFFECT

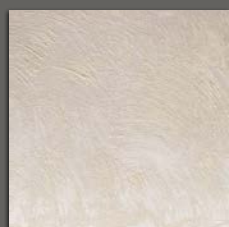

PerlaMuro comes in 17 standard colours.

It's even possible to tint PerlaMuro Base Natural using pigment or paint.

With 3 litres, you can cover 8 to 14.5 m² of wall surface.

When applied with a trowel, PerlaMuro goes on thicker than when using a block brush.

For optimal adhesion, first prime the wall with PerlaMuro acrylic primer.
